

ROUMANIA MAY ENTER THE WAR ANY MOMENT

GERMANS' RUSH IS NOW HELD UP

In Mid-Poland by the Russians Who Seem to Be Taking Heart Again.

INVADERS THROWN BACK

Russians Taking More Prisoners Than They Are Losing and England is Hopeful.

BERLIN, Sept. 16.—The capture of the Russian city of Pinsk, about 100 miles east of Brest-Litovsk, was announced today at army headquarters.

LONDON, Sept. 16.—Coincident with Earl Kitchener's optimistic remarks in the House of Lords concerning the position of the Russian armies, they are showing an increasing disposition to resume the offensive at many points on the eastern front. They are not only pressing their attacks against the Austrians in Galicia, but for the most part are holding up the German rush in mid-Poland. The Russians also assert they have thrown back the invaders near Svyenpnyy and Vilna. The German's battery still holds out at the bridge head near Dvinsk, although the Russians apparently are holding their own in this region.

Counting their captures in Galicia the Russians lately have been taking more prisoners than they have been losing. In England hopes are rising that Earl Kitchener did not make an incautious prediction when he declared Germany had shot her bolt, but that his statement was based on facts. It is said here that von Hindenburg's drive is losing its vigor while von Mackensen is striving to overcome the difficulties of the marsh country and the Austrians appear to be unable to regain the upper hand in Galicia.

The Balkan situation has not yet reached a settlement. The British press views Bulgaria's attitude with some anxiety.

"Bulgaria aims," says the Manchester Guardian, "form the subject of increasingly anxious thought by the entente powers."

American Bankers Want More Than the Members of the Commission Think Just.

COMMISSION IS PLEASED

Millions of Dollars of the Big Loan to the Allies in War Are Pledged.

NEW YORK, Sept. 16.—Members of the Anglo-French financial commission and American bankers working for the success of the proposed billion dollar credit loan to Great Britain and France have somewhat different ideas, it became known today, as to some of the terms governing the loan, chief of which is reported to be the rate of interest.

The committee is reported to believe the maximum rate should be five per cent. Many American bankers believe the mammoth issue should yield at least five and one-half per cent, while there is some talk of requiring six per cent.

Members of the commission seemed well satisfied today with the result thus far. Millions in pledges, it was reported, had already been secured and more pledges were tentatively assured. Negotiations, it was said, had reached the stage where an authoritative statement from the commission would be issued soon, perhaps tonight.

Standard Oil millionaires including John D. Rockefeller, Jr., it was reported today, are considering the term of the proposed billion dollar credit loan to Great Britain and France with a view to participating.

Details of the proposed loan have been placed before Mr. Rockefeller and his associates, it was said today, by J. P. Morgan and Company, the fiscal agents in this country of Great Britain and France. Mr. Morgan called at the Standard Oil offices late yesterday. Other conferences were said, were held today.

Neither Mr. Morgan nor Mr. Rockefeller would discuss the matter even to admitting that they had met. A representative of Mr. Rockefeller positively declined to comment on the situation.

REPETITION OF PANICS IS SIGHTED BY MR. LEWIS

CHICAGO, Sept. 16.—Senator J. Hamilton Lewis today made public a letter protesting against the proposed billion dollar war loan. He has sent the letter to Secretary of the Treasury McAdoo and the federal reserve board. Senator Lewis said his purpose in making the letter public was so that the public could take counsel with the bankers "looking to the proper guardianship of the money of the people." The loan, he said, would invite repetition of the panics of 1873 and 1893. In the course of his letter, the senator said:

"The effort of this foreign loan would be to take one million dollars from our people of their own money and lend it to nations who are spending fifteen million dollars a day. In sixty days all of that money will be spent by the foreign nations and we will have in its place securities of two or three countries issued upon a credit already taxed beyond its resources and we will have no way left by law to collect the collateral."

"This condition would bring on a crisis in this country such as occurred in 1873 and in 1893, when panics were brought on America by selling our money out of the country to bolster the falling fortunes of Europe."

"Remember we never recovered that money. We got securities in concerns which went into receivers hands and bankruptcy as collateral for payment for those lost millions."

"Now if it be said that our people do not need the money at home and that it should be lent abroad then I suggest we lend it to South America."
